

To the Administrator Addressed

DATE:	May 16, 2019
SUBJECT:	Professional Service Provider (PSP) Network Dissolution-July 31, 2019
CATEGORY:	Division of School Improvement Communication
NEXT STEPS:	Share with appropriate staff

The Professional Service Provider (PSP) Network will cease operations as of July 31, 2019. For the last several years, PSPs were approved service providers who were vetted through an application process to provide on-site technical assistance for campuses identified for school improvement through state and/or federal accountability. Approved PSPs were a part of the PSP Network, which was overseen by the Texas Education Agency's technical support team at Education Service Center (ESC) XIII. Through the 2018-

needs assessment conducted by a trained facilitator and recommendations work with an approved capacity builder based on that campus' specific area support transition was informed by feedback from a variety of stakeholders district, and ESC staff. Due to this transition:

- the PSP will no longer be a required member of the Campus Int starting in the 2019-20 school year, and
- the PSP Network will end operations on July 31, 2019.

Campuses that were awarded the Texas Title I Priority Schools (TTIPS) Grant Cycle 5 will continue to contract with an approved PSP as a fulfillment of grant. When the grant cycle ends, those campuses will no longer be required to contract. TTIPS Grant Cycles 4 and 5 end on July 31, 2020.
